MOONEY DENIED FREEDOM

Appeal To Highest Court Will Be Made, Declares San Francisco Attorney

SAN FRANCISCO, (UP)—California's supreme court today again refused the freedom to Thomas J. Mooney, convicted of San Francisco's 1916 Preparedness Day bombing.

The high tribunal rejected Mooney's petition for a writ of habeas corpus in his latest fight for release from San Quentin Penitentiary where he is serving life.

George T. Davis, Mooney's San Francisco attorney, announced he would carry the fight to the Supreme Court of the United States. He said the decision cleared the way for such action. It would be Mooney's last hope for freedom.

The California court held Mooney was given a fair trial and was fairly convicted as a perpetrator of the bombing, which killed 10 persons and maimed 40 others and which was supposedly a protest against American entry into the World War.

He is probably America's most widely known prisoner. The charge that his trial was prejudiced because of his labor union activities made his a "cause celebre" for labor organizations throughout the world, inspired numerous leagues and committees for his defense and has resulted in an unceasing, 21-year fight for his freedom.

Committee Of Five Named To Have Charge With Mrs. Timmons Chairman

Placerville Ski Club will have a display at the El Dorado County Fair, November 5, 6 and 7 at Marcus P. Bennett, Jr., Memorial Park and a committee of five has been named to set up the exhibit.

It is planned that the exhibit will include a varied display of winter sports pictures taken in the county as well as a showing of winter sports equipment and a built-up scene supporting the general theme of winter recreation in the county.

HAWAIIAN PRINCE FACES MURDER CHARGE IN GIRL'S DEATH

HONOLULU, (UP)—Prince David Kawanakoa, sole male descendant of Hawaii's last king, was under indictment today, accused of the second degree murder of a half cast beauty, 21-year-old Arvilla Kinslea, with whom he had been living.

The true bill was returned when grand jurors were told that Miss Kinslea died in the Prince's Waikiki apartment after a fight with the young native at a drinking party Saturday night.

Prince David was ordered arraigned Monday on the indictment, which charged that the beautiful part white girl died of neck wounds suffered in the kitchen of the apartment she occupied with the prince.

Range Management To Be Conference Topic

On Wednesday, November 10, there will be a day-long meeting of stockmen at the Range Experiment at Madera, according to word received by Farm Advisor Ivan Lilley.

Problems of range management will be discussed.

Stockmen of the county who are interested in attending the meeting are urged to contact the Farm Advisor, through whose office an effort will be made to simplify transportation arrangements for those attending the meeting from this county.

Don and Allen Goodrich and James Ball came up Friday evening from Berkeley to spend the week-end with their parents. They all are of the opinion that California will win from U. C. L. A. this afternoon.

MARRIED—Francis Lederer, 31-year-old screen actor, and his bride, Margarita Bolando, 20, known as Margo, stage and screen dancer, just after their wedding before a justice of the peace at Las Vegas, Nev. SLAUGHTER LAW CHANGE SOUGHT

Amendment Seeking To Give Protection, But Liberalize Terms Of Act Is Intended

Amendment of the existing slaughter law is to be proposed to the state Farm Bureau meeting by the Livestock Department of the county Farm Bureau, it was announced Saturday morning following a meeting Friday at Colusa of the Livestock Department of Region Six of the Farm Bureau.

The meeting was attended by Louis Enzler, Dan M. Bassi and John Arthur, representing the county Farm Bureau Livestock Department, along with Farm Advisor Ivan W. Lilley.

Following a general discussion of slaughter law, it was agreed that the El Dorado County group will draw up a proposed amendment to the present law which will be intended to give adequate protection to larger operators, against cattle rustlers, but will also make it possible for the small farmer to butcher and sell his own stock.

The proposed amendment will be offered by the county Farm Bureau Livestock department to the state Farm Bureau meeting at Modesto, November 15 to 19, and it is hoped the suggestion may reach the floor of the convention and gain endorsement.

"Big City" Tale Of Big City

Luise Rainier, Spencer Tracy Co-Starred With Sports World Notables Supporting

Only "tough guys" wanted.

This declaration, or an approximation of it, was the sign hung outside the M-G-M casting office when extras were sought for the spectacular street brawl scene of "Big City", the dramatic story of New York which co-stars Luise Rainer and Spencer Tracy for the first time, and which will be shown starting Sunday on the Empire screen.

There was a good reason for demanding "tough guys" for this particular sequence for the extras had to engage in a hand-to-hand, free-for-all fight with none other than Jack Dempsey, James J. Fieff, Jim McLarnin, Maxie Rosenbloom, Jim Thorpe, Frank Wykoff, Jackie Fields, Man Mountain Dean, Bull Montana and a number of other famous champions of the ring and sports world.

The climax of the Norman Krasna story takes place in a reproduction of Jack Dempsey's Restaurant in New York, and it is at a dinner in this famous rendezvous of noted sports figures that the above list of champions first make their appearance.

FRUIT GROWERS' OPINIONS ON MARKETING INVITED BY FEDERAL AAA

Federal-State Tree Fruit Agreement Expires In April And Pacific Region Committee Seeks Constructive Suggestions From Farmers Who Have Shared In Program

SAN FRANCISCO, (UP)—Further improvement in marketing regulations is advocated by California growers of Bartlett pears, plums, Elberta peaches, and fall and winter pears who ship their fruit to eastern markets for fresh consumption, according to E. L. Markell, chairman of the AAA Pacific Marketing Committee.

With the Federal California Tree Fruit Agreement and Order expiring on April 1, 1938, constructive suggestions

Publisher Inspects Marshall Monument

"So that's the monument," mused K. S. Carlton, of Beaver, Utah, when he stopped at Coloma Saturday morning.

Mr. and Mrs. Carlton, publishers of The Press, at Beaver, called at this office later to "talk shop" and Mr. Carlton said he had wanted to see the Marshall Monument for many years.

"You see, I was in charge of erecting exhibits at the Chicago fair of 1893 and in the exhibits was a model of the Marshall monument."

"All these years I've remembered that monument and wanted to see the real monument and Coloma, and now I've done it."

Mr. and Mrs. Carlton, on a vacation trip, continued south along the Mother Lode to stop at Angels Camp.

No Vote Required If Everybody's Willing

SALT LAKE CITY, (UP)—Utah residents are not required to hold municipal elections if they're satisfied with their present officers and wish to avoid the incident expense, Attorney General Joseph Chey has ruled.

"If any candidate enters the field in opposition to any of the present officers at the expiration of their time of service, then an election cannot be

are now being welcomed by the Agricultural Adjustment Administration from growers who have operated under this marketing agreement program during the past four years, states Markell.

"The Administration, along with industry leaders, is very much interested in determining if tree fruit growers consider the orderly marketing regulations of sufficient benefit to their industry to warrant continuance of the program next year.

"Replies to an open letter recently addressed to several hundred producers as a sort of trial balloon reflect interestingly contrasted points of view, due in some measure perhaps to conditions existing in particular sections where their orchards are located, or their relative position from the standpoint of early or late harvest.

"In general, there seems to be greater satisfaction on the part of producers in localities where fruit matures early in the season, than is displayed by those in regions where there is late maturity. This applies particularly to pears and plums."

Further stating the AAA's position, Markell pointed out: "It is not the desire of the Administration to continue even temporarily any program which is not regarded by a large majority of the growers involved as thoroughly beneficial.

"After four years' experience under the Tree Fruit Agreement, it should be possible for growers of plums, Bartlett pears, Elberta peaches, and fall and winter pears to draw some very definite conclusions.

"We hope many more growers will take the opportunity to express their opinions as to advantages or disadvantages of this Federal marketing program by writing to the Agricultural Adjustment Administration, Room 711, 112 Market Street, San Francisco. Such expressions of opinions, based on operations, should prove of great value to the Administration in its efforts to assist this important California industry."

England May Send More Troops To Shanghai; Paris Reports Demands Made On China

TOKYO, (UP)—The "council on the current situation," comprised of leaders of the Seiyukai political party and other important personages, tonight unanimously adopted a resolution favoring a movement to sever diplomatic relations with Great Britain.

The resolution blamed the British government for complicating international relations in connection with the Chinese situation.

DENMARK REPORTED

PARIS, (UP)—Japan has given China stringent conditions for peace in the Far East, Genevieve Tabouis, political commentator for the newspaper Oeuvre, said today.

The first condition, according to Mlle. Tabouis, is that China recognize the independence of Inner Mongolia. China also must recognize the independence of five northern Chinese provinces with the understanding the inner Mongolian leaders will be permitted to name local governments.

Japan also demands that China cede all territory around Shanghai now occupied by Japanese troops.

Another condition would grant Japan fishing rights along the entire Chinese coast. A fifth would require China to retire from the League of Nations.

In addition, Oeuvre reported, China must scrap her armies and aerial units.

MAY SEND TROOPS

LONDON, (UP)—Great Britain may send additional troops to Shanghai as a result of alleged Japanese attacks on British outposts, it was reported today.

Dr. Chrisman Scans Fall Shoe Crop; Urges We Buy For Comfort First, Style Second

By CLAUD NORTH CHRISMAN, M.D.

I HAVE been window shopping at all, she looked down on me and said, "You must not know what it is to have your corns kicked!" No, I told her, I didn't have any corns. She was getting out just then, but she looked back over her shoulder as if she would like to dispute with me that everybody has corns.

DR. CHRISMAN

The ambition of foot fashioners now is to supply shoes for all types of feet. How this can be done and actually is done has been the subject of years of research in many universities and factory laboratories.

Only a few years ago, the Department of Surgery in the University of Rochester brought out its newly conceived "Electrotopograph"—just a movie camera that photographed the hundredth of a second every slight change of the foot mechanism as the owner walked.

In 1923 this instrument was included in the scientific exhibit of the annual meeting of the American Medical Association. It was awarded a medal for notable achievement in precision methods.

Thus we can get an accurate record not only of the mechanism of the foot but of just where the load rests at every point of the process of walking. We are sure to reveal as we move, where the point of weakness is, the lack of support or the location of pain.

The entire theory of balance has been applied not only to a well-made shoe but to one that will support the ever-changing load at the point of pressure. There is said to be a list of 200 "Doctor" brand of shoes designed to relieve the pain and disability caused by shoes that do not function as they should. Most of these commendable efforts are thwarted by the folks who persist in substituting looks for purpose.

FIRE UNDERWRITERS BALK AT ACCEPTANCE OF WAR RISK PREMIUM

LONDON. (UP)—Perhaps the most remarkable blow yet struck against war is that of the combined fire insurance companies representative of the entire world, except the United States, which have joined in a common agreement refusing to write any insurance, whether direct or by way of reinsurance, against the risk of war on land.

Adherents to this singular international

agreement include not only 127 British companies (including Dominion and colonial companies) and Lloyd's underwriters but also more than 50 French companies, some 15 leading German companies and the principal Italian concerns doing business outside Italy. Business in Germany itself is already taken care of by legislation, and the formal adhesion of the entire Federation of Italian companies is expected shortly.

In addition, the pact covers the fire insurance companies of Belgium, Switzerland, Greece and the Scandinavian countries. The position in the Baltic countries and in Central Europe has not yet been regularized through correspondence is said to be proceeding. Czechoslovakia and Rumania, for example, have not yet completed their arrangements, either among themselves or with their re-insurers.

REPLACING BLAST-TORN SCHOOL—Remember that disaster at New London, Texas, last March when a gas explosion blew up the consolidated school and more than 300 children lost their lives? New London folk are trying to erase memories of the tragedy and here they are rebuilding the school. Meanwhile classes are held temporarily in frame buildings nearby.

BLIND 20 YEARS, DENVER WOMAN REGAINS SIGHT

DENVER, (UP)—A grandmother's determination to see her grandchildren, three of whom were born since she became blind 20 years ago, led to a delicate eye operation which restored the woman's sight.

It was in 1917 that Mrs. Mary V. Dunklee, wife of District Judge G. F. Dunklee of Denver, lost her sight. It was believed then that the cause of her blindness lay in some incurable ailment.

So for 20 years Mrs. Dunklee lived in a world of darkness.

Recently she became convinced in her own mind that an operation would restore her sight. A Denver doctor was equally convinced. Friends warned her of the hazards of such an operation at her advanced age. She believed it worth the risk.

"Do you realize," she would say, "that I have three grandchildren whom I have ever seen? I don't think any risk too great that might permit me to see them."

Following the operation she saw them all, also a fourth grandchild, now a grown man, whom she last beheld as an infant.

HIGH SCHOOL PUNTER KICKS BETTER MINUS SHOE

WACO, Tex., (UP)—America's roster of barefooted sports heroes has none more unusual than Fred Hall, ace punter of the Waco high school football team.

Hall plays in a special-built shoe with a slide fastener that permits him to remove the shoe with a flick of the wrist and be ready to kick barefooted. Except when kicking, Hall wears football shoes. When the signal is called for punt, the kicker quickly removes his right shoe and boots the ball zooming down the field from his bare foot.

The backfield star found he got more accuracy and distance barefoot than kicking with a shoe, so his coach agreed to let Hall do it his way.

Hall declined to say what might happen in event he had to do his kicking on a muddy field.

"TALKING BOOKS" HELP SIGHTLESS ENJOY DARK HOURS

SACRAMENTO The California state library, furthering a WPA project, is enabling hundreds of blind persons to "read" with talking books.

From the library's department for the blind, considered one of the finest in the United States, are distributed to blind persons in the California-Nevada area the machines and records to those who cannot afford to purchase the equipment.

Called the greatest boon which modern science has brought to the sightless, the original books were designed and manufactured by the American Foundation for the Blind in New York. Since then the Federal government also has undertaken production of the machines and records under the direction of the Library of Congress.

To date nearly 500 machines, which resemble a portable phonograph, have been distributed in this area.

Here are some further figures we wish to add for those interested in safety—and who isn't? In the first nine months in the United States, deaths due to auto accidents have increased nine per cent over the same period for last year—bringing the total to 28,140. These figures assume especial importance in the face of the new automobile show just opening in San Francisco this week—while this year's car is claimed to be the safest car ever built, there is no escaping the fact that little or no importance has been made in the nut that holds the steering wheel!

100 FLOATS TO BE SHOWN IN EL PASO FESTIVAL ON NEW YEAR'S DAY

EL PASO, Tex., (UP)—Some 100 floats depicting "the world" will feature El Paso's Sun Carnival pageant to be held for the third consecutive year on New Year's Day.

Consuls of every country in Europe, Asia, Africa, and many of the islands have sent sketches of suggested designs for floats to depict their countries or localities, upon the request of Dr. C. M. Hendricks, director-general of the Sun Carnival.

Approximately 100 of these sketches will be chosen for designs for the floats to be used in the pageant.

The Sun Bowl football game, between the winner of the Border Conference and a team to be selected by the Sun Carnival committee, will follow the parade in the afternoon.

2-Way Radio Approved For Police Force

PHILADELPHIA, (UP) — The police department's 152 red cruisers and 333 motorcycles will be equipped with two-way radio sets, "the greatest forward step in war on crime in the city's recent history," according to Mayor S. Davis Wilson.

Mayor Wilson said tests had been conducted "for months" and that they were "very successful." The radio system will enable police to talk to headquarters, instead of the old one-way, headquarters-to-patrol car method.
